

Remarks

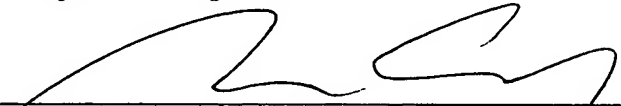

The amendments to the specification are made to correct numbering of sequence identification numbers and do not add new matter. The amendment to claim 13 corrects an improper dependency and also contains no new matter.

A sequence listing accompanies this filing, in computer-readable form and paper copy. I hereby state that the sequence information contained in the computer readable form and the paper copy is the same and contains no new matter with respect to the current filing or the provisional application from which this application claims priority.

Applicants request favorable consideration of the application.

Respectfully submitted,

By
